Section I. Ion accelerators and ion sources

A new design of a compact high current ion accelerator
G. Proudfoot, R. McAdams and A.J.T. Holmes 1
A 250 kV high current ion accelerator for applications in nuclear astrophysics
G. Bogaert, R. Meunier, D. Ledu, C. Angulo, W.H. Schulte, P. Aguer, A. Coc, A. Lefebvre, F. de Oliveira, J.P. Thibaud, T. Paradellis, E. Kossionides, S. Harissopulos and G. Galios 8
BECRIS – a 5 GHz ECR source for a CN Van de Graaff
P. Arndt, N. Golovanivski, H. Homeyer and M. Martin 14
Beam profile and emittance measurements for ion implantation
M. Sarstedt, R. Thomae, H. Klein, A. Maaser, J. Müller, B. Seiler and M. Weber 17
TIARA electrostatic accelerators for multiple ion beam application
Y. Saitoh, S. Tajima, I. Takada, K. Mizuhashi, S. Uno, K. Ohkoshi, Y. Ishii, T. Kamiya, K. Yotumoto, R. Tanaka and E. Iwamoto 23
CANDELA photo-injector high-power tests
C. Travier, M. Bernard, P. Dufresne, G. Michaud, M. Omeich, M. Roch and J. Rodier 27
Conceptual design of a compact photon source in the 1–100 keV range
M. Silari and M. Milazzo 33
Design and construction of heavy ion RFQ linac with effective acceleration structure
M. Okamura, Y. Oguri, K. Sasa, T. Ito, M. Okada, T. Hattori, O. Takeda, K. Satoh, T. Miura, Y. Tanabe and N. Tokuda 38
Effects of 3D image charge force on the motion of off-centered beams in an RFQ
Y. Oguri, G. Wu and T. Hattori 42
ILU-type electron accelerators for industrial technologies
V.L. Auslender 46
Design study of an energy-variable RF-accelerator for ion implantation
J. Dehen, H. Deitinghoff, H. Klein, M. Sarstedt, A. Schempp and R. Thomae 49

Section II. Electron accelerators

CLIO, an infrared free electron laser facility
R. Prazeres, J.M. Berset, R. Chaput, F. Glotin, D.A. Jaroszynski and J.M. Ortega 54
The Rhodotron, a new high-energy, high-power, CW electron accelerator
Y. Jongen, M. Abs, J.M. Capdevila, D. Defrise, F. Genin and A. Nguyen 60
Improvement of electron beam shape control in radiation processing
A. Strasser, R. Fang and F. Kuntz 65

Section III. Synchrotron radiation

Synchrotron radiation stimulated gas desorption from metals
P.C. Marin 69

0168-583X/94/$07.00 © 1994 – Elsevier Science B.V. All rights reserved

The synchrotron light source ROSY
D. Einfeld, H. Büttig, S. Dienel, W. Gläser, Th. Goetz, H. Guratzsch, B. Hartmann, D. Janssen, H. Krug, J. Linnemann, W. Matz, J.B. Murphy, W. Neumann, W. Oehme, M. Picard, M. Plesko, D. Pröhl, R. Schlenk, D. Tomassini and H. Tyrroff 74

Section IV. Nuclear reaction analysis and charged particle activation analysis

Channeling charged particle activation analysis of light impurities at trace levels in GaAs
Th. Schenkel, H. Hebert, J.D. Meyer, R.W. Michelmann and K. Bethge. 79
Thin layer activation techniques at the U-120 cyclotron of Bucharest
B. Constantinescu, E.A. Ivanov, G. Pascovici, L. Popa-Simil and P.M. Racolta. 83
Remeasurement and compilation of excitation function of proton induced reactions on iron for activation techniques
S. Takács, L. Vasváry and F. Tárkányi 88
Localization and mobility of oxygen in monocrystalline GaAs by channeling-NRA
H. Hebert, Th. Schenkel, J.D. Meyer, R.W. Michelmann and K. Bethge. 95
Characterization of boron nitride thin films using (α, p) nuclear reactions
G. Giorginis, P. Misaelides and M. Conti. 100
Stoichiometry of NiO_xH_y films determined by ion-beam analysis
W. Wagner, F. Rauch and K. Bange. 104
Non-destructive analysis of archaeological bronzes by nuclear techniques
M.A. Respaldiza, B.M. Gómez-Tubío, A. Sánchez del Junco, F. Barranco and C. Sáiz-Jiménez. 109

Section V. Backscattering, channeling and recoil analysis

Applications of cyclotron based ion scattering
L.J. van IJzendoorn, J.W. Niemantsverdriet, R.J. Severens, P.W.L. van Dijk and M.J.A. de Voigt 114
Computer simulation of ion beam methods in analysis of thin films
G. Vizkelethy 122
Elastic recoil detection analysis with heavy ions
W. Assmann, H. Huber, Ch. Steinhausen, M. Dobler, H. Glückler and A. Weidinger 131
Analysis and characterization of a new magneto-optic display material
Th. Kessler, H. Baumann, J. Reinmann, K. Friedrich, R. Omet and K. Bethge. 140
Nuclear microbeam analysis of wear particles in tissue surrounding failed hip joint implants
G.W. Grime, J.T. Triffitt, M.C. Williamson and N.A. Athanasou 145
Analysis of boron-doped amorphous silicon by means of a heavy-ion time-of-flight ERD spectrometer
E. Arai, A. Zounek, N. Sekino and K. Saito 149
The role of stress in deuterium ingress into thin foils of Zr and Zr–2.5wt%Nb
J.S. Forster, R.L. Tapping, T. Laursen and J.R. Leslie 153
High resolution techniques using scanning proton microprobe (SPM)
M. Cholewa, A. Saint, S. Prawer, J.S. Laird, G.J.F. Legge, R.A. Bardos, G.F. Moorhead, G.N. Taylor, S.-A. Stuart and J. Howard 157
Investigation of silicon width (p, p′) resonance scattering in ⟨110⟩ channeling direction
F. Ditrói, J.D. Meyer, R. Michelmann, D. Kislat and K. Bethge 164
Comparison of MeV-implanted GaAs and InP
T. Bachmann, S. Schippel, E. Wendler, W. Wesch, U. Richter and W. Witthuhn 168
Thin layer analysis with heavy ion RBS
M. Döbeli, A. Lombao, D. Vetterli and M. Suter 174
Channeling and TEM investigation of nanosized thallium inclusions in aluminium
A. Johansen, E. Johnson, H.H. Andersen, L. Sarholt-Kristensen and M. Olsen 178

Diffusion parameters at the Pt–Co interface
D. Raiser, I. Rossini and J.C. Sens 183
Investigation of the electronic energy loss of light ions for materials analysis
J.D. Meyer, R.W. Michelmann, F. Ditrói and K. Bethge 186
High depth resolution ERDA of H and D by means of an electrostatic spectrometer
O. Kruse and H.D. Carstanjen 191

Section VI. Particle induced X-ray emission

PIXE study of the kinetics of biomaterials ossification
G. Weber, G. Robaye, F. Braye, H. Oudadesse and J.L. Irigaray 200
RBS-PIXE analysis on μm scale on thin film high-T_c superconductors
J.A. van Kan, J.H. Rector, B. Dam and R.D. Vis 204
Proton microprobe and X-ray fluorescence investigations of nickel distribution in serpentine flora from South Africa
J. Mesjasz-Przybyłowicz, K. Balkwill, W.J. Przybyłowicz and H.J. Annegarn 208
Trace elements in platinum group minerals studied using nuclear microscopy
H. Tamana, A. Criddle, G. Grime, D. Vaughan and J. Spratt 213
Data acquisition and scan control system for nuclear microprobe and other multiparameter experiments
M. Bogovac, I. Bogdanović, S. Fazinić, M. Jakšić, L. Kukec and W. Wilhelm 219
A PC-based data acquisition package for nuclear microbeam systems
G.W. Grime and M. Dawson 223
PIXE microprobe for geoscience applications
J. Meijer, A. Stephan, J. Adamczewski, H.H. Bukow, C. Rolfs, T. Pickart, F. Bruhn and J. Veizer 229
Reference materials for PIXE analysis of aerosols
O. Valković, D. Ceccato, G. Moschini, S. Galassini and E. Menapace 233
A high resolution crystal diffraction spectrometer for X-ray analysis
U. Lehnert, K. Merla and G. Zschornack 238

Section VII. Accelerator mass spectrometry

Impurity determination in electronic materials by accelerator mass spectrometry
F.D. McDaniel, J.M. Anthony, J.F. Kirchhoff, D.K. Marble, Y.D. Kim, S.N. Renfrow, E.C. Grannan, E.R. Reznik, G. Vizkelethy and S. Matteson 242
Hydride ambiguities in the accelerator mass spectrometry (AMS) of heavy elements
M.A. Garwan, M.-J. Nadeau, X.-L. Zhao and A.E. Litherland 250
Accelerator mass spectrometry analysis of aroma compound absorption in plastic packaging materials
K. Stenström, B. Erlandsson, R. Hellborg, A. Wiebert, G. Skog and T. Nielsen 256
The charge state distributions of carbon beams measured at the Lund Pelletron accelerator
A. Wiebert, B. Erlandsson, R. Hellborg, K. Stenström and G. Skog 259
Isobar separation with gas ionization counters in accelerator mass spectrometry
U. Zoppi, M. Suter and H.-A. Synal 262
Isobar discrimination in accelerator mass spectrometry by detecting characteristic projectile X-rays
M.J.M. Wagner, H.-A. Synal and M. Suter 266

Section VIII. Ion beam modification

Ion implanted waveguide lasers in insulators
P.D. Townsend 270

Ion beam mixing in metal/metal and nitride/metal layers – new perspectives
K.-P. Lieb, W. Bolse and M. Uhrmacher 277
High-energy ion implantation for electrical isolation of microelectronic devices
M.C. Ridgway, S.L. Ellingboe, R.G. Elliman and J.S. Williams 290
Ion beam techniques in microelectronics
B.J. Sealy and P.L.F. Hemment 298
Tailored defects in HTSC – What can we learn from swift heavy ion irradiation?
M. Kraus, G. Kreiselmeyer, J. Daniel, M. Leghissa, G. Saemann-Ischenko, B. Holzapfel, P. Kummeth, R. Scholz and L.Ya. Vinnikov 307
MeV ion processing applications for industry
J. Asher 315
Computer simulation of ion-beam assisted film growth
W. Möller 322
Ion beam deposition
D.G. Armour 325
Spike effects in the ion mixing of metallic marker system
F. Shi, W. Bolse and K.P. Lieb 332
Experimental study and modeling of structure formation in buried layers at ion beam synthesis
S. Reiss, R. Weber, K.-H. Heinig and W. Skorupa 337
Adaptation of the 70 kV INP ion implanter to the IBAD technique
B. Rajchel, M. Drwiega, E. Lipińska and M. Wierba 342
$^{1}H(^{15}N, \alpha\gamma)^{12}C$ nuclear resonance broadening measurements of hydrogen incorporation during plasma etching of GaAs and $Ga_xIn_{(1-x)}As$ quantum wells
L. Persson, H.J. Whitlow, J. Keinonen, P. Torri, I. Maximov, L. Samuelsson, J. Knox and K.G. Malmqvist 346
Electrical effects of residual defects in Si after high energy implantation of Ge^{+} ions and annealing
R. Kögler, J. von Borany, D. Panknin and W. Skorupa 350
A heavy ion implanting facility at the Chiang Mai University
D. Suwannakachorn, D. Boonyawan, J.P. Green, S. Aumkaew, C. Thongleurm, P. Vichaisirimongkol and T. Vilaithong 354
A new approach to ion beam modification of powders
H.R. Müller, W. Ensinger, G. Frech and G.K. Wolf 357
Investigations of ultrathin silicon nitride layers produced by low-energy ion implantation and EB-RTA
A. Markwitz, H. Baumann, W. Grill, A. Knop, E.F. Krimmel and K. Bethge 362
Effect of noble gas ions on the synthesis of c-BN by ion beam assisted deposition
D. Bouchier, G. Sené, M.A. Djouadi and P. Möller 369
Waveguiding structures in polymers by ion implantation
S. Brunner, D.M. Rück, W.F.X. Frank, F. Linke, A. Schösser and U. Behringer 373
Gettering of hydrogen in titanium caused by nitrogen implantation
K. Neu, H. Baumann, N. Angert, D. Rück and K. Bethge 379
Ion-beam induced modifications of Sb-Al bilayers
F. Shi, W. Bolse, K.P. Lieb and J.-P. Wilbrandt 382

Section IX. Miscellaneous techniques

Accelerator based techniques for contraband detection
G. Vourvopoulos 388
Low temperature bolometer detectors in ion beam analysis
A. Broniatowski 394

Neutron focusing using capillary optics
H. Chen, D.F.R. Mildner, R.G. Downing, R.E. Benenson, Q.F. Xiao and V.A. Sharov 401
Application of accelerator in research of condensed lasants for nuclear pumped lasers
E.A. Seregina, P.P. D'yachenko and V.V. Kalinin 412
Transition radiation very soft X-ray source
K. Umiastowski and A. Nguyen 416
A superconducting solenoid as probe forming lens for microprobe applications
A. Stephan, J. Meijer, M. Höfert, H.H. Bukow and C. Rolfs 420
Secondary electron emission factors from metals bombarded with highly-charged, laser-produced tantalum ions
Y. Amdidouche, M. Bourgeois, J.L. Collier and T.R. Sherwood 424
Stationary DIANE Equipment Description and performance of the thermal neutron source
S. Cluzeau and P. Le Tourneur 428
DIANE stationary neutron radiography system image quality and industrial applications
S. Cluzeau, J. Huet and P. Le Tourneur 432
Model of the contamination effect in ion-induced electron emission
A.M. Arrale, Z.Y. Zhao, J.F. Kirchhoff, D.K. Marble, D.L. Weathers, F.D. McDaniel and S. Matteson 437
Ions and electrons generated by an UV excimer laser
V. Nassisi 443

Conference Summary

Applied research and technology with accelerators – State of the art, 1993
J.L. Debrun, K. Bethge and J.L. Duggan 447

Author index 451
